## The Next Generation of Wi-Fi Tools

Sidos is the next generation of Wi-Fi tools, offering a comprehensive solution that enables Wi-Fi professionals to efficiently measure and analyze networks, troubleshoot issues, and design Wi-Fi with ease.

### Sidos Wave

Sidos Wave is a groundbreaking Wi-Fi enterprise-grade measurement device that sets a new standard in the market for speed and accuracy. Its design allows for high-precision surveys across all Wi-Fi bands (2.4 GHz, 5 GHz, and 6 GHz), making it an ideal tool for Wi-Fi professionals who need reliable and fast data collection.

#### Highlights:

- Supports 2.4 GHz, 5 GHz, and 6 GHz (Wi-Fi 6E)
- Advanced antenna array
- Intuitive color touch screen supporting sidos mini-apps
- Rugged and lightweight design
- Multipurpose ethernet port
- Reinforced 1/4"-20 mounting slot
- Over-the-air firmware updates
- Share and use without licensing restrictions

## Sidos Cloud

Sidos Cloud is a powerful AI-assisted cloud platform designed for Wi-Fi planning, analysis, and troubleshooting. Whether you have to design a new network from scratch, upgrade, or troubleshoot an existing network, Sidos makes it easy to understand and analyze network performance and potential issues, enabling more precise troubleshooting and the efficient design of Wi-Fi networks.

### Highlights:

- Sidos AI interactive simulations and what-if analysis
- Sidos AI automatic wall calibration
- True 3D multi-floor network design
- Advanced troubleshooting tools
- Easy collaboration and project sharing
- Modern, blazing-fast, intuitive UI
- Weekly updates and improvements

## Sidos Mobile App

The Sidos Mobile App is designed to work with the Sidos Wave, ensuring fast, accurate, and user-friendly site surveys. The app features FastStart technology for quick setup, negating the need for account creation or logins, and supports multi-floor surveys and cloud synchronization. This makes it an ideal tool for both beginners and seasoned professionals, simplifying the process of data collection and integration with Sidos Cloud for analysis.

### Highlights:

- QR code-based FastStart technology
- Pause and resume
- Multi-floor survey support
- Offline survey mode
- User-friendly Interface
- Wireless connectivity with Sidos Wave\*

## Why Sidos

**Sidos is redefining standards for Wi-Fi professionals with its blend of premium enterprise-grade hardware and intuitive, AI-powered cloud software. With a flexible licensing model that allows sharing the Sidos Wave internally, with partners, or even with customers without restrictions, Sidos becomes an easy choice for addressing any Wi-Fi challenges.**

- Enterprise-grade hardware
- Flexible licensing model
- Intuitive survey process
- AI-powered, fast, and intuitive cloud software
